## The OW2 Big Data Initiative

[Homepage](#) - [Overview](#) - [Deliverables](#) - [Events](#) - [Participants](#) - [Join us](#) - [Policy and Licensing](#)

The OW2 Big Data initiative attracts a vibrant eco system around open source **Big Data** and **Business Intelligence** technologies, by identifying and working on actual business scenarios in which these technologies can bring valuable results extracting valuable information.

The initiative also focuses on **Open Data**, as a primary source of information, freely available, in order to increase the value of information owned by organizations and enterprises.

### THE OW2 BIG DATA INITIATIVE FOCUSES ON THE EXTRACTION OF VALUE FROM INFORMATION

*"Data are not useful per-se, and is only when they are properly handled and understood in the right context that they generate value"*
