DocDokuPLM

Next-gen web technologies
for next-gen business applications

With HTML5 the future is landing

I've seen the

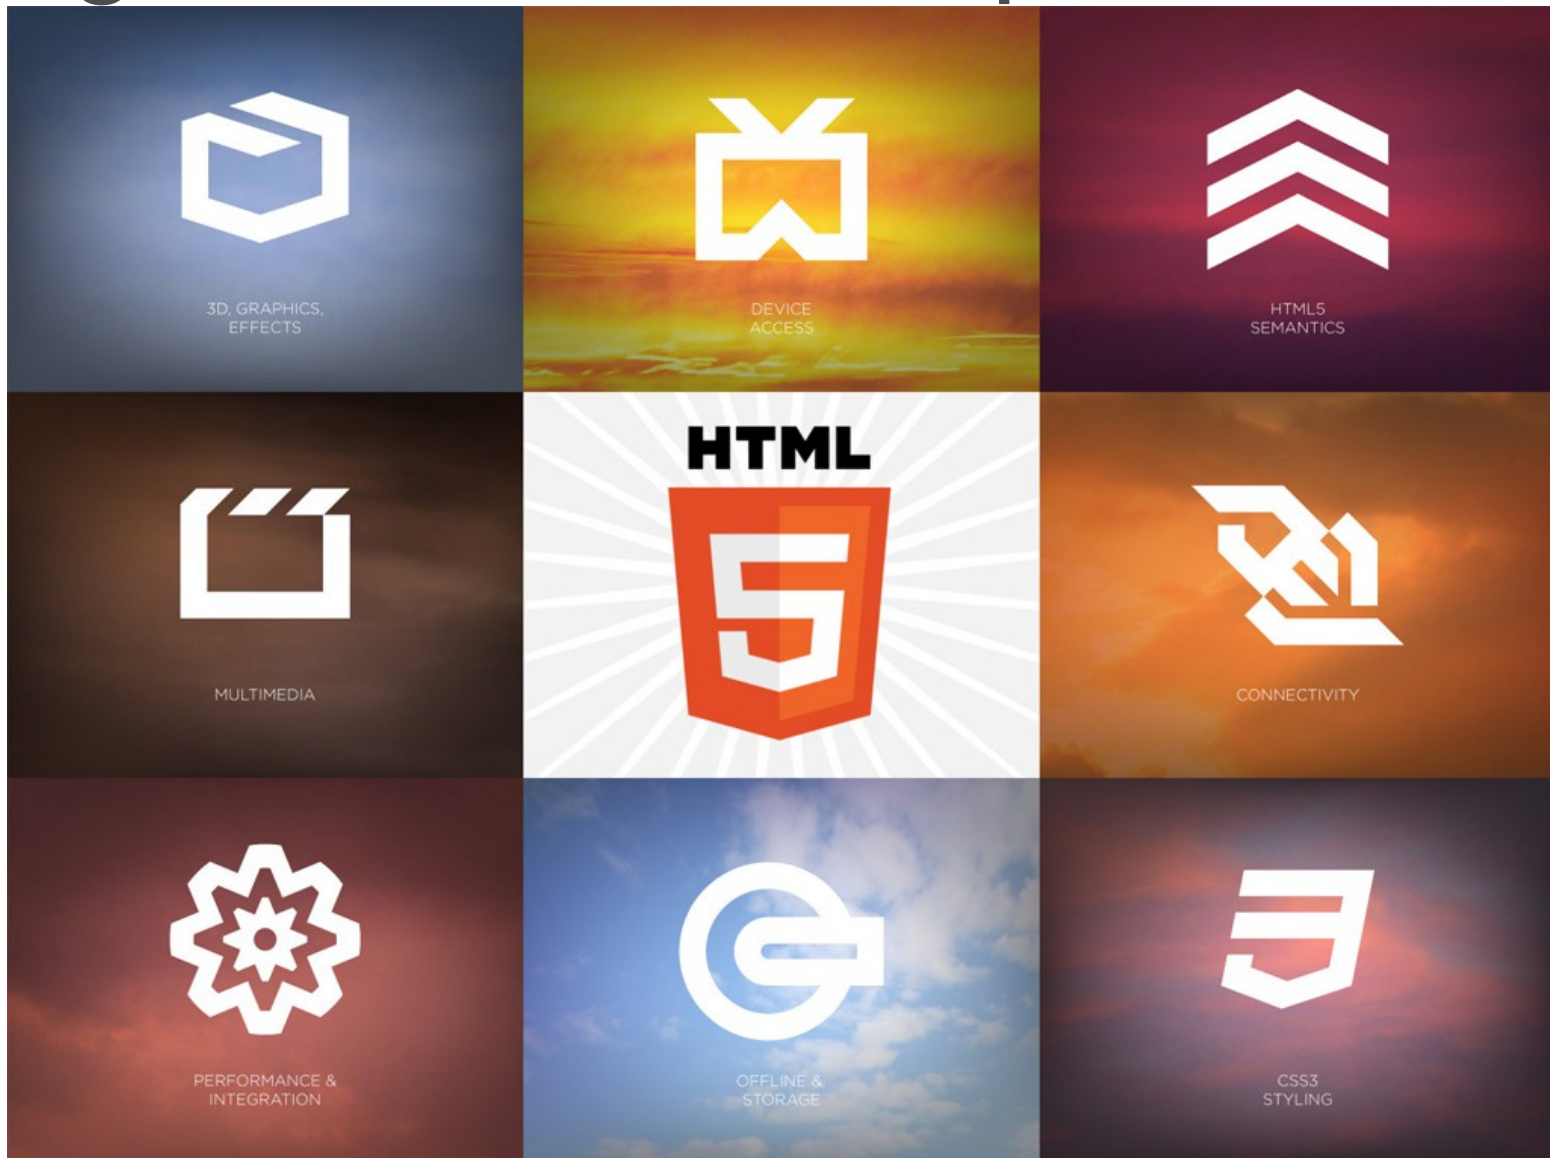

FUTURE

It's in my

BROWSER

Imagination meets implementation

What to do with all that stuff?

These technologies are game changers!

Finally no software category can resist the web

- Live monitoring
- Real-time applications
- 3D design

Hence, these applications can at last benefit from the strengths of the web

- Mashup
- Openness

Let's have a look at DocDokuPLM

- **Product Lifecycle Management:** manage/share data around product
- **Simple metaphor:** GitHub for manufactured products
- Open Source (GPL3, OW2)
- OWF Demo Cup 2012 winner
